My "Story" and the VIBE 432 Energy Cards
and Hopefully with Insights that May be Helpful for Readers

By Hattie Parker, MS Ed, Astrologer/Numerologist, Aura and Card Reader

I have been making my living as a career/professional metaphysician for over 30 years. If you had told me in my teens and/or twenties I would be consulting stars, paying attention to numbers, interpreting energy fields and consulting Tarot to counsel people on solving life problems when I "grew up" I would have been totally perplexed. I had no idea what these activities were, nor was I even the least bit interested in learning about them. However, then, of course, as my life has evolved, I have learned from personal experience that there is much wisdom in the phrase, *"Life is what happens when you are making plans."*

I have known myself to be someone, to be aligned with and functioning in tune with typical Gemini Moon behavior. I am interested in many different subject matters. Thus, in my younger days I was a bit of a career-oriented social butterfly. After an initial10 year stint of teaching school while being married and not thinking of myself as destined to be a life-long professional I got divorced. Then, out of necessity, I faced needing to support myself. Me being me I found myself on a path of having short periods of time, attracted to a particular career path only to become bored or feeling hopelessly stuck in a dead end. I was thus repeatedly finding myself moving on. However, something was different when I started on the metaphysical career track. Early on I studied Tarot on a whim and a lark and however I stuck with it because I had a strong sense that I was doing what I was "supposed" to be doing. Motivated by this sense I decided I would take a stab at making a living using these skills. For the sake of creating a context it is relevant to note that interest in spirituality as a subject matter and focus was not as popular as it is today. Additionally, there was no internet to facilitate locating teachers and study resources. There were also no platforms for self-promotion. The most prominent role models of what it meant to be successful as a metaphysician were the authors of popular books on various topics related to spiritual subject matters. This included, for example, the likes of the metaphysical giants such as Deepak Chopra, Louise Hay and Wayne Dyer to name but a few.

So then, I, needing to make a living and wanting to succeed, I told myself I would write a book. And in fact, 30 years ago, in 1993 I wrote and completed a tarot book and I, thus, embarked upon a journey that I regard as a journey into my very own kind of personal Hell. It is a journey that has been painful and instructive. It is a journey of facing personal demons. I will not bore you with too many details and simply share that I have had to come face-to-face with realizing that I have a very formidable inner critic that is totally convinced that anything I do or attempt to do is not good enough. And, thus, my "Story" has evolved. I created my own reality I did not get that book published. And I have gone on to attempt (many numerous times) to think I had an idea I would actually carry through on only to ultimately fail to deliver.

So my fellow friends I share with you that by engaging with me on this journey you accompany me on a journey out of Hell. There are many ways the Universe has been conspiring to make it possible for me to have a product that needs a few more tweaks but works and I now trust myself to move forward with getting it out in the world. I have a very long gratitude list (and some of you in this group have a prominent role in being on this list).

In a world where there are no accidents I feel so blessed you all have joined Nanette and me on this journey.

And a few parting shots are:

- In my experience pushing through limiting beliefs hasn't gotten easier with age. --So there is no time like the present to launch.
- You may find yourself amazed (as I have been recently) about just how very abundant the Universe can be.

The System for Interpreting VIBE 432 Energy Cards draws significantly from Numerology.

Master Numbers

Numbers with 2 identical digits 11, 22, 33, 44, 55, 66, 77, 88, and 99 are more powerful than single digit numbers and/or mixed double-digit numbers. They can be utilized to guide focused attention on positive self-talk and can serve as aids to accessing contact with your higher self. An uplifting and fun approach to connecting with the power of **Master Numbers** is to take note of them in your everyday life (on clocks, billboards, etc.) and choose to view them as divinely inspired guidance.
